

The main screen has a header footer and a table component for displaying new invites with such fields as group, phone number, and email. The table has a button for adding new invites by email and individual groups.

Filter

XF

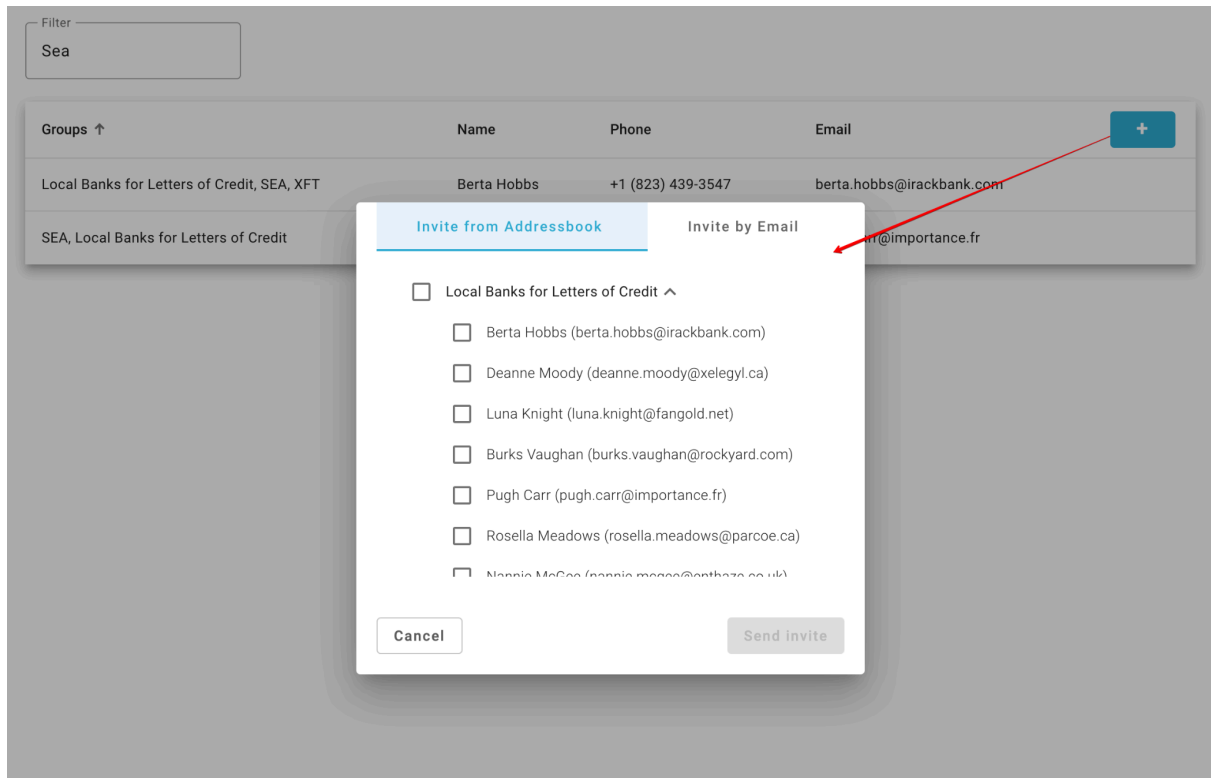

| Name | Phone | Email | Groups ↑ |  |
|-----------------|-------------------|-----------------------------|---|---|
| Berta Hobbs | +1 (823) 439-3547 | berta.hobbs@irackbank.com | Local Banks for Letters of Credit, SEA, XFT | |
| Fabien Manaudou | +1 (857) 432-3638 | fabien.manaudou@banquego.be | XFT | |

Filter

XF

| Name | Phone | Email | Groups ↑ |  |
|-----------------|-------------------|-----------------------------|---|---|
| Berta Hobbs | +1 (823) 439-3547 | berta.hobbs@irackbank.com | Local Banks for Letters of Credit, SEA, XFT | |
| Fabien Manaudou | +1 (857) 432-3638 | fabien.manaudou@banquego.be | XFT | |

Adding new groups to the list. Clicking on + opens a modal window with tabs, which includes invite by address and email.

Adding can be done both for one and for a group using the group checkbox that expands and collapses.

The data is saved to a table.

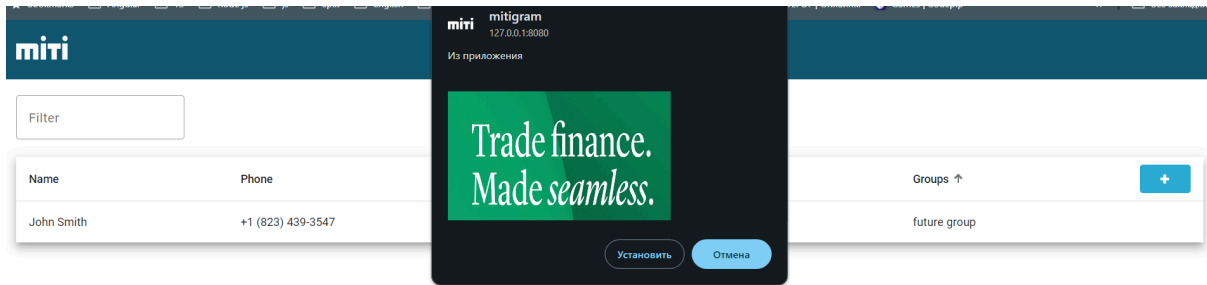

We emulated receiving data from server using http client, save data in our store , due we using NGRX, for simplifies the state management and have powerful set of developer tooling (added invites and counterparties data can be viewed through reduxTools) , which making it easier to debug and optimize the application's performance
